GET IN TOUCH

I'M PASSIONATE ABOUT BUILDING PRODUCTS AND CONSTANTLY LEARNING. EVERY DAY, I'M EXPLORING SOMETHING NEW.

01 / ABOUT ME

Hello, I'm **Aditya Raj** — a proactive pre-college student from **Ranchi**, dedicated to building a career in software engineering through self-discipline and continuous learning.

Joining **Chandigarh University, Uttar Pradesh** in July 2026 to pursue a B.Tech in CSE with an **AI/ML specialization** and a Microsoft track. 170 credits across 8 semesters of real industry projects.

Currently self-teaching **Python** — DSA, scripting, automation — building the base before the classroom even starts. No mentor, no structure. Just discipline and direction.

The foundational work happening today will soon transition into hands-on projects. Watch GitHub and LeetCode as the first builds take shape.

"Every expert was once a beginner."

SEMESTERS

∞

CURIOSITY

02 / SKILLS & STACK

01

Programming Languages

Building strong foundations with systems and scripting languages.

01 Python · 02 C · 03 C++ · 04 Java · 05 C# (.NET) · 06 Bash / Shell

02

Web & Backend

Crafting full-stack products with modern frameworks and clean architecture.

01 HTML/CSS/JS · 02 React · 03 Node.js · 04 REST APIs · 05 SQL

03

AI & Machine Learning

Building intelligent systems — from models to pipelines.

GET IN TOUCH

01 Machine Learning 02 NumPy 03 Pandas 04 NLP 05 DSA

04

Cloud & DevOps

Deploying at scale with Microsoft Azure and automation pipelines.

01 Azure 02 DevOps 03 CI/CD 04 Linux 05 Cloud Security

03 / B.TECH ROADMAP — CHANDIGARH UNIVERSITY 2026–2030

Semester 1 · 24 Credits

Foundations

Jul 2026 → Dec 2026

Engineering Mathematics
Programming for Problem Solving
Physics for Computational Tech
Cybersecurity Fundamentals
Foundation & Application of AI
Design Thinking
English Communication I

Semester 2 · 25 Credits

Python & DSA

Jan 2027 → Jun 2027

Linear Algebra & Vector Calculus
Programming in Python
Computer Ecosystem
Data Structures & Algorithms I
Network Security
English Communication II
Universal Human Values

Semester 3 · 23 Credits

Semester 4 · 23 Credits

AR

GET IN TOUCH

Systems & Networks

Jul 2027 → Dec 2027

System Design
Computer Organization & Architecture
Database Management System
Computer Networks
Operating System
Software Engineering
Cloud Security

Full Stack & OOP

Jan 2028 → Jun 2028

Object-Oriented Programming
Algorithms & DSA II
Full Stack Development
Digital Image Processing
Soft Skills & Aptitude
Project Based Learning IV

Semester 5 · 24 Credits

ML & GenAI Intro

Jul 2028 → Dec 2028

Machine Learning Fundamentals
Introduction to Generative AI
Natural Language Processing
AI for Cyber Threat Intelligence
Compiler Design
Environmental Study

Semester 6 · 22 Credits

Deep Learning & GANs

Jan 2029 → Jun 2029

Deep Learning
Generative Adversarial Networks
Reinforcement Learning
AI in Healthcare Security
Distributed Systems
Gender & Diversity

Semester 7 · 16 Credits

Advanced AI & Internship

Jul 2029 → Dec 2029

Advanced Topics in Generative AI
Ethical AI & Responsible Computing
Elective I
Internship / Industrial Training
Project Based Learning VII

Semester 8 · 13 Credits

Industry & Graduation

Jan 2030 → Jun 2030

Elective II
Seminar on Trends in GenAI
Industry Collaboration Project
Project Based Learning VIII

04 / MICROSOFT CERTIFICATIONS

AI-900 Azure AI Fundamentals

Core AI/ML concepts & Azure AI services · Target: Sem 1–2

AZ-900 Azure Fundamentals

Cloud computing concepts, infrastructure & deployment models · Target: Sem 1–2

DP-900 Azure Data Fundamentals

Database concepts, SQL/NoSQL & cloud data storage patterns · Target: Sem 2–3

AI-102 Azure AI Engineer Associate

Build & deploy chatbots, vision models & AI solutions in Python · Target: Sem 5–6

DP-203 Azure Data Engineer Associate

Data pipelines & architectures to power ML at scale · Target: Sem 6–7

AR

GET IN TOUCH

DevOps Engineer Expert

Automate CI/CD pipelines & manage secure deployments at scale · Target: Sem 7–8
